PROFESSIONAL SUMMARY

iOS Developer with production experience in Swift, UIKit, and SwiftUI, contributing to 7 client apps with 5 live on the App Store. Builds features end to end, from RESTful API integration and offline storage with Core Data and SwiftData to push notifications, in-app subscriptions, and Bluetooth devices. Improves stability and performance in existing codebases by fixing memory leaks, retain cycles, and data races, and writes clean, testable code that follows Apple's Human Interface Guidelines.

KEY ACHIEVEMENTS

- Main iOS contributor to Fikar on the App Store: 150 of 156 commits on a 265-file SwiftUI and UIKit codebase.
- Shipped StoreKit 2 subscriptions for True Drop and built the CoreBluetooth sensor module for Sokar.
- Localized production apps into 4 languages, including right-to-left Arabic and Urdu.
- Built a modular Clean Architecture app with 97 automated tests and a Vapor back end (FitTracker).

TECHNICAL SKILLS

iOS Development	Swift, UIKit, SwiftUI, Combine, Core Data, SwiftData, Core Animation, Core Graphics, Core Image, CoreBluetooth, StoreKit 2, AVFoundation, WidgetKit, MapKit
Architecture	MVVM, Clean Architecture, Coordinator Pattern, Protocol-Oriented Programming, Dependency Injection, SOLID
Data and Performance	RESTful APIs, URLSession, Codable, JSON, Socket.IO, Offline Storage, Caching, Keychain, Multithreading, GCD, Swift Concurrency (async/await, actors), Memory Management, Performance Tuning
Integrations	Push Notifications, Firebase (Cloud Messaging, Authentication, Firestore, Realtime Database, Analytics), Apple Pay, Stripe, Sign in with Apple, Google Sign-In, Deep Linking, App Tracking Transparency, SKAdNetwork
Testing and Tools	XCTest, XCUITest, Swift Testing, SwiftLint, Xcode, Git, GitHub, Bitbucket, Swift Package Manager, CocoaPods, TestFlight, App Store Connect
Practices	Apple Human Interface Guidelines, Localization (right-to-left), Accessibility (Dynamic Type), Code Review, Agile

PROFESSIONAL EXPERIENCE

iOS Developer | MLBench

Nov 2025 – Present

Lahore, Pakistan

Deliver features, integrations, and fixes across 7 client iOS apps, 5 live on the App Store, in close collaboration with back-end, design, and QA teams.

Fikar – Islamic community platform APP STORE

- Main iOS contributor (150 of 156 commits) on a 265-file SwiftUI and UIKit codebase; shipped releases through version 2.0 with TestFlight and App Store Connect.
- Built appointment booking with recurring availability scheduling and Apple Pay checkout, private Q&A with real-time chat and voice messages, polls, events, and leaderboards.
- Implemented push notifications with Firebase Cloud Messaging and deep links that open the exact screen for each notification type; authored the payload contract adopted by the back-end team.
- Improved stability and memory use by fixing retain cycles, leaked AVPlayer and database observers, a data race in shared state, and a pagination race condition.

- Reduced network reads by replacing per-row live Firestore listeners with one-time fetches; added offline support with SwiftData caching and network monitoring.
- Localized the app into English, Arabic, Urdu, and Bengali with right-to-left layouts, and wrote 9 end-to-end XCUITest flows.

True Drop – Sobriety and recovery app APP STORE

- Implemented monthly and yearly auto-renewable subscriptions with StoreKit 2: product loading, verified transactions, upgrades, and transaction updates.
- Synced premium entitlements with RESTful back-end APIs at launch, login, and account changes.
- Built daily check-ins, streak tracking with skipped-day handling, and animated milestone progress with SwiftUI, MVVM, and Combine; introduced SwiftLint.

Sokar – Glucose monitoring app

- Built the CoreBluetooth module for a glucose sensor: scanning, pairing, session management, command encoding, response parsing, and CRC-16 frame validation.
- Created a protocol-based mock Bluetooth manager for hardware-free development and testing, plus diagnostic logging; added Arabic and English localization.

Belleria – Connected device companion app

- Sole iOS developer; built the app from scratch in SwiftUI with a feature-based structure and a light and dark design system.
- Wrote a reusable async/await networking layer as a Swift actor with Keychain-stored device credentials, and implemented Wi-Fi device setup, alerts, and real-time updates over Socket.IO.

Koy and Lumashape – Social discovery and photo measurement apps APP STORE

- Koy: built state-driven radar pulse animations for nearby-user discovery; fixed push notification delivery, Firebase phone authentication, Sign in with Apple, and Google Sign-In.
- Lumashape: added input validation and upload of original and segmented images; fixed image orientation and measurement unit bugs.

iOS Developer | 3TechSoft

Jul 2025 – Oct 2025

Rawalpindi, Pakistan

Sketch Anime – Photo editing app

- Built a photo-to-sketch feature with Core Image, SwiftUI, and UIKit using the Coordinator pattern inside an existing UIKit codebase.
- Improved image-processing responsiveness by moving work to background threads with cancellable tasks and reducing memory pressure during heavy operations.
- Built adaptive iPhone and iPad layouts, resolved popover, camera-permission, loading, and error-state issues, and integrated App Tracking Transparency and SKAdNetwork.

PROJECTS

FitTracker – Swift 6, SwiftUI, Core Data, CoreBluetooth, Vapor

- Offline-first heart-rate workout tracker across 10 Swift Package modules using Clean Architecture, MVVM, and dependency injection, with Core Data on background contexts behind repository protocols.
- 97 automated tests written test-first with Swift Testing; Vapor back end with JWT authentication and PostgreSQL.

Movies Browser – UIKit, Core Data, REST API | github.com/Dawoodakbar/BroswersApp

- UICollectionView compositional layouts, UISearchController, paginated REST API results, Core Data offline favorites, and NSCache image caching.

EDUCATION AND LANGUAGES

Bachelor of Science in Software Engineering

Sep 2021 – Jun 2025

International Islamic University, Islamabad

Languages: English (professional working proficiency), Urdu (native)
